 REFERENCE: Specimens received 7/20/89
 EXAMINATION REQUESTED BY: WMFO
 SPECIMENS: Q1, Q5 and Q5, envelopes
 Q2, Q4 and Q6, letters

89-6811-3

 The enclosed items are further described in a separate
 Laboratory report.

 The specimens were examined and fifteen latent fingerprints and
 two latent palm prints of value were developed on Q1 through Q5.

 The latent fingerprints do not meet the necessary criteria to
 conduct an automated fingerprint search in our Identification Division
 file.

RECEIVED
JAN 10 1964
SPECIAL DELIVERY
AIR MAIL

Result of examination:

Q1 through Q6 were searched through the Anonymous Letter File without effecting an identification. Copies have been added to that file for future reference purposes.

No watermarks or indented writing were found on Q1 through Q6.

It was determined that the typewriting impressions on the Q1 and Q2 items most closely correspond with the Laboratory standards for an IBM Courier Pica style of type. In addition, characteristics were noted in the Q1 and Q2 typewritten impressions which indicate that the typewriter used to prepare those impressions was equipped with a film type disposable ribbon which retains those impressions.

It was determined that the typewritten impressions on Q3 through Q6 most closely correspond to the Laboratory standards for an S.C.M. style of type used on portable electric typewriters. In addition, characteristics were noted in those impressions which indicate that the typewriter they were prepared on was equipped with a fabric ribbon.

Characteristics were noted in the typewritten impressions on Q3 through Q6 which indicate they were probably prepared on the same typewriter.

Q1 through Q6, which have been photographed, will be returned separately along with the results of the latent fingerprint examination.
